(Please complete Section 1 and return to the EPHE Academic Advisor who will perform a GPA check to determine if you are eligible for admission to the Honours program.

**SECTION 1**

I wish to be considered for the BA (Recreation and Health Education) program Honours program.

Name: ........................................................................................................................................

Student number: ....................................................................................................................................

Email: ........................................................................................................................................................

EPHE 357 registration:  Completed □ In-progress □ Will complete .........................

Cooperative education:  Yes □ No □

Number of academic units completed: ..............................

Signature: .................................................................................................................. Date: .................................

**EPHE Academic Adviser use:**

GPA in EPHE courses (excluding EPHE 104-137): .................

Meets GPA requirement:  Yes □ No □ .................................

With the approval of the Faculty of Exercise Science, Physical and Health Education, the student above is eligible for Honours.

Once you have applied to an EPHE Faculty member and they have indicated their in-principle approval to supervise your BA (Recreation and Health Education) Honours project, ask them to complete Section 2 (i.e., below). Then, submit the completed form to the EPHE Academic Advisor who will add Honours to your curricula.

**SECTION 2**

I agree to supervise the Honours project of the student listed above to the standards required of the BA (Recreation and Health Education) Honours program (See reverse).

Supervisor’s name: .................................................................

Supervisor’s signature: .................................................................

Topic area: ........................................................................................................
Information about the BA (Recreation and Health Education) Honours program

The BA (Recreation and Health Education) Honours program is intended for motivated, self-directed students who want to engage in research during their undergraduate program. For students considering post-graduate study, the Honours program may be of benefit when applying for admission to degrees such as MA, MSc, MD, MEd or PhD.

To be admitted to the Honours program students must have:

1. A minimum 7.0 grade point average in all EPHE courses (excluding 100 level EPHE courses)

The following changes are made to the BA (Recreation and Health Education) curricula when Honours is added:

1. EPHE 357 (1.5 units) is added as a required course (see recommended sequence of courses)
2. EPHE 499 (3.0 units) is added as a required course (NB, registration in this course requires completion of an Undergraduate Pro Forma Course Registration by the Honours student and their supervisor)
3. Reduction of 300-400 level electives by 3.0 units
4. The overall units required for BA (Recreation and Health Education) Honours degree becomes 61.5 units

It is strongly recommended that students complete EPHE 357 before commencing their Honours project.

All requirements of the BA (Recreation and Health Education) Honors program should be completed within five academic years.

A BA (Recreation and Health Education) Honours degree will be awarded to students who:

1. Complete an Honours project that normally includes:
   a. Hours of work equivalent of 3.0 unit’s worth of course work
   b. In depth involvement working with research data (i.e. collecting and/or analyzing
   c. A written document of sufficient substance in both length and content which is directly presenting research related to the Honours project
   d. Oral presentation to the BA (Recreation and Health Education) Honours peer cohort in the spring of the year the student graduates

2. And who obtain:
   a. A graduating average of at least 7.0
   b. A grade of at least and “A” in EPHE 499 (NB, a student who achieves a grade lower than A- in EPHE 499 will graduate under the Major program, providing all other requirements for the degree are fulfilled)
