Amazing job prospects
Nearly everyone who graduates from our programs finds work in their field within a few months, with starting salaries around $66,500 per year. With changing demographics and an increasingly wired world, the demand for Engineers and Computer Scientists will only keep growing.

Diverse options
If you think you’re not the Engineering or Computer Science type, think again. With dozens of specializations, options and interdisciplinary programs ranging from business to visual arts, you can combine your technical skills with your other interests. And best of all, you’ll end up with a unique specialization that opens even more doors to opportunity.

Real-life learning
No need to wait to start cashing in on the job market—the integrated Co-operative Education program, optional in most Computer Science programs, adds 16 months of work experience to your degree. You’ll build your resume, meet valuable contacts, and make an average of $50,000 before you even graduate!

Inspired teaching in small classes
Don’t be just a number. Our class sizes are smaller than at many other universities—you can develop real relationships with your professors and classmates, and get the support and recognition that make the difference.

Spectacular location
If you’re going to spend your time at university, why not live and learn somewhere awesome? UVic is located on Canada’s fabulous west coast where you can work and play in a fun, vibrant city, surrounded by mountains, rain forests, and the Pacific Ocean.

For further application and program information, please phone: (250) 472-4935

PROGRAM OPTIONS

Customize your degree by adding a specialization, option, or interdisciplinary combined program. Depending on your choice of programs, options include:

Business  Mathematics
Computer Graphics & Gaming  Mechatronics
Energy Systems  Music
Fluids & Aerodynamics  Physics
Geography  Psychology
Health Information Science  Security & Privacy
Human Computer Interaction  Visual Arts

* For a list of approved social studies, science and academic courses, see http://registrar.uvic.ca/undergrad/admissions/requirements/bc.html#1
** We require a minimum of 73% in this course
*** We recommend Grade 12 Chemistry for this course

Your admission average is calculated based only on the listed Grade 12 courses.

Admission cut-offs in recent years have been 70%–80%.

For more details, including admission requirements for applicants from other provinces and countries, see http://registrar.uvic.ca/undergrad/admissions/requirements/programreq.html

MONEY MATTERS

How much is this all going to cost? It varies for every person, but here’s the estimated breakdown for one full year:

- Tuition and other fees (co-op, bus pass, health and dental plan, etc.) – $6750
- Textbooks and supplies – $1700
- Housing and food – $7500

Guaranteed residence if you’re coming from high school!
See: www.housing.uvic.ca/winter

There are plenty of ways to save:
- Buy your textbooks used from your student society or the on-campus used book store. You can even sell them back when you’re done!
- Share an apartment with friends to cut down on housing costs.
- Don’t forget about co-op. Co-op students earn more than $10,000 per year on average. (www.uvic.ca/coopandcareer/engrcoop)
- Get a Work Study job while you’re on campus and earn up to $3400 a year. (http://registrar.uvic.ca/safa/workstudy/wsstudentsinfo.html)
- Apply for scholarships and bursaries. There are dozens just for Engineering and Computer Science students, including lots for students in 2nd, 3rd and 4th year. (www.engr.uvic.ca/awards)

Tell us about your Grade 11 and 12 marks and you could get an early offer of admission and automatic scholarships!
