Faculty of Engineering

COURSE OUTLINE

ELEC 453 – Antennas and Propagation

Term – Spring 2016 (201601)

Instructor
Dr. Jens Bornemann
Phone: 250-721-8666
E-mail:

Office Hours
Days: Mondays and Thursdays
Time: 15:00-16:00
Location: EOW 309

Course Objectives
- To introduce students to fundamental radiation, propagation and antenna concepts
- To familiarize students with the terminology used in antenna engineering
- To expose students to basic analysis and design aspects

Learning Outcomes
At the end of the course, students will be able to ...
- identify fundamental parameters as they apply to antennas and propagation
- evaluate the influences of reflection, diffraction, fading, scattering, absorption
- carry out link budget calculations in the presence of a variety of losses and obstacles
- design straight wire antennas, loop antennas and helical antennas
- identify the fundamental concepts and limitations of antenna arrays
- design broadside, endfire and phased-array antennas
- design sectoral, pyramidal and conical horn antennas
- design rectangular and circular patch antennas including their feeding networks
- solve the characteristic properties of reflector antennas
- design simple reflector antennas
- apply fundamental concepts to detect possible errors in calculations
- apply the limits of radiation in the microwave spectrum

10. Ultra-Wideband Antennas  
11. Corrugated Horns  
12. Antenna Measurements  

*Mid-term test*  
*Review*  
Total  

A-Section(s): A01 / CRN 21156  
A02 / CRN 21157  
Days: Mondays & Thursdays  
Time: 13:00-14:20  
Location: ELL 160  

**Required Text**  
Title: Antenna Theory: Analysis and Design, 2nd or 3rd Ed.  
Author: C.A. Balanis  
Publisher: J. Wiley & Sons  
Year: 1997 or 2005  

**Optional Text**  
Title: Antenna Theory and Design  
Author: W.L. Strutzman and G.A. Thiele  
Publisher: J. Wiley & Sons  
Year: 1998 or 2012  

**References**: Course Website: TBA  

**Assessment**:  
Assignments: 10 %  
Mid-term 30 %  
Final Exam 60 %  
Due Dates: TBA; full marks for reasonable effort  
Date: 22 Feb 2016  

**Note**:  
1. Students failing the mid-term test (less than 15 out of 30) will be evaluated by a scheme, which adds the percentage of the test to that of the final exam. This procedure will also be generally adopted for assignments and the midterm test if it results in a higher percentage for the student.  
2. Students earning less than 45% (less than 27 out of 60) in the final exam will fail the course.  

The final grade obtained from the above marking scheme for the purpose of GPA calculation will be based on the percentage-to-grade point conversion table as listed in the current Undergraduate Calendar.  

**Assignment of E grades and supplemental examinations for this course will be at the discretion of the Course Instructor. The rules for supplemental examinations can be found in the current Undergraduate Calendar.**  

http://web.uvic.ca/calendar/FACS/UnIn/UARe/Grad.html  

**Note to Students**:  
Students who have issues with the conduct of the course should discuss them with the instructor first. If these discussions do not resolve the issue, then students should feel free to contact the Chair of the Department by email or the Chair's Secretary to set up an appointment.
Accommodation of Religious Observance

Policy on Inclusivity and Diversity
http://web.uvic.ca/calendar/GI/GUPo.html

Standards of Professional Behaviour
You are advised to read the Faculty of Engineering document Standards for Professional Behaviour, which contains important information regarding conduct in courses, labs, and in the general use of facilities.
https://www.uvic.ca/engineering/assets/docs/professional-behaviour.pdf

Cheating, plagiarism and other forms of academic fraud are taken very seriously by both the University and the Department. You should consult the entry in the current Undergraduate Calendar for the UVic policy on academic integrity.

Course Lecture Notes
Unless otherwise noted, all course materials supplied to students in this course have been prepared by the instructor and are intended for use in this course only. These materials are NOT to be re-circulated digitally, whether by email or by uploading or copying to websites, or to others not enrolled in this course. Violation of this policy may in some cases constitute a breach of academic integrity as defined in the UVic Calendar.
