05 70 01  FINISHES

1. Typical finishes for exposed (outdoor) metal fabrications:
   i. Hot-dip galvanized.
   ii. Stainless steel.
   iii. Clear anodized aluminum.

2. Where painted assemblies are required, use durable factory finish (preferred), or a marine grade system:
   i. Electrostatic painting.
   ii. Factory pre-painted process.
   iii. Epoxy coat and aliphatic urethane topcoat, marine grade system. For increased durability, consider galvanized steel for painted assemblies.
