**To Market, to Market, to Buy a Fresh Fig. . .**

by Lisa Hitch

...home again home again jiggery jig! It’s that time of year again when the local farmers gather their bountiful crops and bring them to outdoor markets for all of us to enjoy. As well, some of these markets feature live musicians as well as beautiful handcrafts made by local artisans. Visiting the markets can give you a real sense of Victoria and all it has to offer. And if you like to go right to the farms to buy fresh or pick your own produce, pick up your free copy of Farm Fresh which lists all the farmers on Southern Vancouver Island (www.islandfarmfresh.com). Here are a few of my favorite markets you may like to try.

Father’s Day is approaching and there are many children in Family Housing who may not see Dad on June 19th. A special thanks to all those generous dads out there who take a little extra time playing chess, throwing a ball, or fixing a bike with someone else’s child. Father’s Day happens every day in Family Housing!

Parking Update

Preparation will begin over the summer for the parking changes due to be implemented in September. These will include the installment of new signage and a permit dispenser, and doing some line repainting. Most importantly, all of the reserved resident parking will be refreshed and re-numbered. This will require two days to complete and will be accomplished by dividing the area in half, having one side remove all of their vehicles from the inside lots to visitor parking areas or anywhere else they can find parking on the first day, then repeating the process for the other half the following day. Campus Security, the new administrators of our parking, will be following up with more information as to the exact time this will happen. If you have any questions, contact Gordon Dash of Campus Security at 721-6685.

ResNet Changes

On April 28, an email was sent out from Housing regarding ResNet, the Internet access for residents of University housing. As of May 1st, 2005, Housing, Food & Conference Services started administering ResNet services to the Family Housing community, taking over from Computer Services. The fees are now monthly rather than daily, and are a flat rate of $30 per month due on the first of each month, regardless of how many days in the month or how late in the month the service is renewed. Accounts will be automatically disabled if payment has not been received by the first day of the month. The Housing Office will accept cash, debit, MasterCard and Visa for ResNet payments. Credit card payments can be taken over the phone at 721-8395. Payments for ResNet MUST be made separately from Family Housing rent payments. Current subscribers will continue to receive ResNet services until their current subscription with Computer User Services expires. If you currently have a subscription, and would like to know the expiry date, please send an email to hfosnet@uvic.ca with your Family Housing unit number.

Technical Support for ResNet is still provided by Computer User Services. For more information, please see http://helpdesk.uvic.ca/resnet/ or call 721 7687.

If you have questions, please direct them to Gavin Quinney at gavinq@uvic.ca.

Attention Bird Lovers! by Sonya Chandler

A reminder that all of the seed-based bird feeders that you may be using can also attract rodents like squirrels, mice and rats. A couple of pointers I found online: Don’t use mixed bird seed, those cute little squirrels and even rats seem to like sunflower and peanuts as much or more than acorns. Put your feeder where the rodents can’t reach. If you’ve seen squirrels in your neighborhood, it’s safe to assume rodents will visit your feeder. Think long and hard before you hang anything from a tree limb. Squirrels are incredibly agile, and any feeder hanging from a tree, with or without a squirrel guard or baffle, is likely to become a squirrel feeder. What’s worse, frustrated rodents have been known to entertain themselves by chewing right through plastic and wooden feeders. In the long run, a squirrel-proof feeder or any feeder on a pole with a baffle is the least aggravating solution. The most effective squirrel-proof feeder is the pole-mounted metal “house” type. The simplest solution is the squirrel-proof feeder or pole (anything slippery, like metal or plastic, and rounded roofs rodents can’t climb) and storing your seed in a metal container that can’t be chewed through. Rats and mice can also become a problem where there’s seed spillage under the feeder. You can visit http://www.bird-birding.ca for more info.
