The Hidden Cemetery at Eleon: Early Kings in Central Greece?

Since 2011 the University of Victoria has been collaborating with Greek and American colleagues to excavate the site of ancient Eleon. Part of this project is run as an archaeological field school for students to get UVic credit (GRS 495) and to gain valuable professional training. The work focuses on the Mycenaean period (1700-1050 BCE). This lecture will highlight results thus far and provide a preview of the 2018 season.
