**Texts**  
2. Several additional readings will be posted on the course’s web page (CourseSpaces). Students are responsible for acquiring a copy of these.

**Course Description**  
We think we have knowledge of a real, objective, material world – we think we know such things as that humans are mammals, that water is wet, that Henrik Sedin plays for the Canucks, that the earth revolves around the sun, etc. But what, exactly, does such ‘knowledge’ consist in? What, if anything, do each of the cases of knowledge just mentioned have in common? If we lack a clear understanding of what knowledge is, can we be sure whether we know what we think we know? Sceptics claim that we don’t have any, or much, knowledge at all. Other philosophers insist that while we do have knowledge, this isn’t – *can’t be* -- knowledge of a material world that exists independently of our thoughts. In the first part of the course, we will look at some central historical writings centering on the problem of our knowledge of the external world. In addition to giving us some historical grounding, this will introduce some key concepts and issues (knowledge, justification, scepticism, doubt, certainty, etc.). In the second part of the course, we will turn to more recent attempts to give a systematic theory of just what these notions – centrally, knowledge and justification – involve, and to respond to sceptical challenges to our everyday belief in an objective, material world.

**Expectations**  
Students are expected to come to class having read the assigned readings, and prepared to talk and ask questions about the material. Students who miss a class are responsible for any material covered therein, as well as for finding out what announcements, if any, were made.

**Three quick tips for doing well in the course**  
1. Come to class (when you must miss, let the instructor know ahead of time; afterwards, talk to a class-mate about what happened – get their lecture notes, visit the instructor in office hours).  
2. Do the readings ahead of time, and read ‘actively’ – pay attention to what you’re reading, ask yourself what point(s) the author(s) is trying to make, why this matters, what questions you’d like to ask the author, and so on.  
3. If you’re having trouble with any of the course material, speak to the instructor right away.
Evaluation

Students’ grades will be based on:

- two short essays, worth 25% and 30% respectively
- a final exam: 35%
- several short in-class quizzes (T/F, multiple-choice, fill-in-the-blank, short answer, etc.), based on the readings, and possibly some short take-home assignments; the quizzes will not, as a rule, be announced ahead of time: 10%

The short papers might also be thought of as take-home exams. You will be given questions calling for short, essay-style responses. You will have some choice in which you answer. Your response should be concise, well-structured, and to the point; it must be between 800 and 1000 words in total length. The short essays will be discussed more in class when the first topics are distributed.

Beyond the student’s having adequately addressed the topic question(s) on which he/she writes, evaluation of the short essays and any essay question(s) appearing on the exam will be based on: evidence of comprehension of the materials and issues addressed; evidence of original and critical thought with regard to that material; the extent to which the student stakes out a position and provides good reasons and arguments for it; the extent to which the student communicates his/her ideas clearly (using complete and grammatical sentences, correct terms, a clear essay structure, and so on). For the short essays, *the use of outside materials (i.e., any readings not assigned for the course) is permitted only if you have received the instructor’s permission ahead of time*. Any materials used for the short essays (i.e., any course readings) must be properly cited in the standard way.

Without exception, late papers unaccompanied by a documented medical excuse will be penalized at the rate of 5% per day or portion thereof, starting as soon as the due date and time have passed. Should such a medical emergency arise, let the instructor – ahead of time, if possible. An unexcused absence without a documented medical excuse on the day of a quiz will result in a score of zero.

Grades on assignments will be converted to a letter grade using the standard University scheme ([http://web.uvic.ca/calendar2015-05/FACS/UnIn/UARe/Grad.html](http://web.uvic.ca/calendar2015-05/FACS/UnIn/UARe/Grad.html)): 100-90 = A+, 85-89 = A, 80-84 = A-, 77-79 = B+, 73-76 = B, 70-72 = B-, 65-69 = C+, 60-64 = C, 50-59 = D, 0-49 = F.

Plagiarism and other forms of cheating will not be tolerated. It is each student’s responsibility to know the University’s regulations in this regard. The Policy on Academic Integrity is published in the University Calendar.¹ Other resources concerning cheating and plagiarism include the Libraries’ plagiarism guide,² and the Learning and Teaching Centre’s information for students.³

The final exam will be cumulative. It will be a combination of questions like those on the quizzes, short answer questions, and a choice of longer essay-style questions.
