<tr>
<td>4. Designing the Support Pathway</td>
<td>Members continued their work from the previous meeting, engaging in a small-group exercise with a view to charting pathways to support services - noting gaps, identifying challenges, and accounting for intersectionality. The goal is to create a guide that clearly delineates options available for support for survivors of sexualized violence. Following the individual group sessions, members presented their concepts and each was discussed by the Group. These concepts, along with the feedback received during discussions, will be incorporated into one draft document for further discussion and input at the next Working Group meeting.</td>
