University Safety Committee (USC)
Reports to VPFO with a mandate to develop campus-wide safety policies, review safety issues and performance, assist LSC’s with unresolved issues and promote safety communication. The USC is part of the university’s safety management system and operates as a joint safety committee under WorkSafeBC representing all unions and management groups.

Local Safety Committees
Report to assigned Deans or Directors. They are also part of the university's safety management system and operate as joint safety committees representing all units and buildings. Their role is to monitor safety activities at a local level, make recommendations to unit managers, consult on safety programs and education, and promote safety communication. They also communicate with the University Safety Committee and OHSE, both which monitor their performance and provide advice, assistance and resources.

Research Safety Committees
Reports to VPFO with a mandate to review and ensure compliance with regulatory health and safety requirements in the areas of biosafety, radiation safety, laboratory safety and marine safety. These committees also communicate with VPR to ensure compliance with granting agencies and related research processes.

Union/Management Committees
These committees operate through the terms of their respective collective agreements. CUPE 951 and CUPE 917 have joint union/management safety committees described in their agreements. There is no formal reporting or communication with other health and safety committees.
