

PoND

Polymer Nanoparticles for Drug Delivery Admission Application Form

Name: _____

Proposed home PoND institution:

Proposed entry term:

Proposed Supervisor:

Proposed Co-Supervisor:

Fill out the following only if transferring from a current graduate program:

Current institution: _____ Current degree (PhD or MSc):

Year of current degree program:

Description of proposed research *(to be completed by proposed supervisor and/or co-supervisor)*

Applicant _____

Date _____

Proposed Supervisor _____

Date _____

Letter/email confirming graduate studies
enrollment or admission is attached

Proposed Co-supervisor _____

Date _____

PoND

Polymer Nanoparticles for Drug Delivery

Application Instructions

In order to be considered for admission into the PoND program, a student must first be accepted into graduate studies at one of the host institutions (UVic Chemistry, UVic Physics, UofT Pharmacy, Concordia Chemistry, or Laval Engineering). Therefore, a letter or email from the host department's graduate committee confirming acceptance or conditional acceptance into graduate studies (or current enrollment in graduate studies in the case of a transferring student) must be submitted with the completed application form.

The research proposal **should be completed by the proposed supervisor and/or co-supervisor.**

Signature of the student indicates that the student understands the following requirements for completion of the PoND program:

1. Collaborative research (as outlined in the Description of proposed research) leading to a successfully defended thesis (MSc) or dissertation (PhD).
2. 20% of program time spent in (an) industrial internship(s) (MSc and PhD).
3. Successful completion of 3 PoND training modules (MSc and PhD).
4. Successful completion of MITACS Step module "Skills of Communication" (MSc and PhD).
5. Successful completion of 1 PoND capstone course (PhD only).
6. Mandatory participation in annual PoND Research Days, including an annual (non-graded) seminar **or** poster presentation; all students must present at least one **seminar** at a Research Days event before defending their thesis or dissertation (MSc and PhD).

For further details on PoND program requirements, students are directed to a PoND supervisor, the PoND Program Coordinator, or the PoND website www.uvic.ca/science/chemistry/create/index.php.

Signatures of the proposed supervisor and co-supervisor indicate a commitment to support the student in completing all PoND requirements.

The completed form and confirmation of admission to (or current enrollment in) graduate studies should be submitted via email to the PoND Admission and Recruitment Committee (ARC) chair (Dr. Matt Moffitt), mmoffitt@uvic.ca.

For completion by Admissions and Recruitment Committee only

This application has been reviewed and the applicant is **accepted** **rejected** for admission into the PoND program.
