STEPS TO PLANNING FOR A DEGREE

STEP 1: Select two or more 400 level courses and learn directly from research Faculty in a smaller classroom environment. Write down the 300 level prerequisites for these courses.

STEP 2: Select other 300 level courses. Write down the 200 level prerequisites for all of the 300 level courses.

STEP 3: Select other 200 level courses if required. Write down the 100 level prerequisites for all of the 200 level courses.

STEP 4: Based on your course selections and any co-requisites from other departments or faculties, decide between the Bachelor of Arts or Bachelor of Science degrees.

STEP 5: Based on your course selections, choose a concentration (optional). If uncertain, a concentration can be added, removed or changed at any time.

STEP 6: See a departmental undergraduate adviser who will help you complete a Record of Degree Program (RDP) form. The RDP can be changed at any time. Don’t forget to complete the Academic Writing Requirement [one of ENGL 135, 146, 147 or equivalent] as early as possible.
