The Natural City

Vic Derman
Councillor, District of Saanich

Our “Auto-centric” cities and towns have produced a myriad of unsustainable outcomes, including loss of open space, environmental degradation, and choking congestion. Increasingly, they have become unattractive, inhospitable, and a blight on the planet that hosts us. It’s way PAST TIME to produce communities designed for people, harmonious with local environments, and able to address the challenges of a very different twenty-first century world.

The Natural City presents a visionary, comprehensive, and thought provoking approach to our urban future. It’s a transformative future critical for today’s residents and those who come after us.
