SOCI 220 ¹
The Information Society, Social Media and Digital Media/Culture

Instructor: Dr. Simon Carroll

Course Description:
Explores how various digital technologies are transforming our perceptions of ourselves, our friends, families and the world around us. The sociological perspective will be applied to developing a critical understanding of how our social landscape has been transformed by social media and other information and communication technologies and interrogate what it means to us as individuals as well as the larger society.

Course Outcomes/Objectives:
Students will learn about contemporary social theories relevant to understanding the transformations in society brought about by the digital revolution, with a particular emphasis on the use of internet-based technologies, mobile telephony and social media platforms. Students will better understand the relationship between the political economy of contemporary capitalist societies and the digital information revolution.

Course Pre/Co-requisites:
N/A

Topics May Include:
