BUILDING CAPACITY IN THE DIGITAL ECONOMY

UVic and Canada’s Digital Technology Supercluster are working together to address the digital skills gap and issues related to equity, diversity and inclusion in engineering and computer science.

Demand for digital skills has been increasing faster than supply

Your input and experience is critical for developing solutions

1. What digital skills are most important?
2. How can post secondary institutions support the industry to remain competitive?
3. How can equity, diversity and inclusion be used to grow the resource talent pool?

GET INVOLVED AND WIN

Complete a survey
