Secondary B.Ed. Post-Degree Professional Program General Science teachable subject area

Name: _____

Student #: _____

→ See the program website at www.uvic.ca/education for complete information.

Annually each fall, it is updated with [program application instructions](#) and information for the following September intake.

Applicants must also satisfy the [experience requirement](#) described there.

If you have completed science courses in topics relevant to the BC secondary school science 8-10 curriculum, but not the requirements specified for a teachable subject area in biology, chemistry or physics, you may be eligible for the general science teachable subject area.

General science cannot be combined with the biology, chemistry, or physics teachable subject area (if admitted with one of those areas, you will automatically be eligible for general science program experiences).

General science teachers need a diverse science background to teach the varied science topics of the BC grade 8-10 science curriculum.

Due to limited practicum opportunities and program seats, we strongly recommend combining this subject with another teachable subject other than social studies.

Courses completed over 10 years before program entry must be reviewed for currency.
