This MEd in Educational Technology is designed for educators, learning support, and administrators, at the K12 or post-secondary level, who wish to develop their competencies to integrate technology to enhance and transform teaching and learning. There will be an emphasis on developing literacies with digital, networked, and open technologies as we explore the major shifts in education such as personalization, connectedness, openness, assessment, and access.

These educators will be able to provide leadership in the transformations toward more open inquiry-based learning and diverse classroom modalities, such as blended, online, open, and multi-access. Our graduates will develop personal learning networks to carry with them into their professional practice as we make use of video conferencing, social media, and collaborative apps to support innovative projects.

• Offered multi-access or entirely online
• Program cost is approx. $11,000 (5 installments)

Proposed Program:

EDCI 568 Discourse on Social Media for Connected and Personalized Learning
EDCI 570/1 Research in Curriculum and Instruction
EDCI 515 E-Research: Harnessing and Understanding Technology in Research
EDCI 569 The Distributed, Blended, and Open Classroom
