

## COMPLEMENTARY STUDIES ELECTIVE COURSES

*Effective August 2019*

The following regulations have been approved by the BEng/BSEng Student Programs Committee:

1. A complementary studies elective is a course that involves material that complements the technical content of the curriculum. To be counted as complementary studies a course must satisfy each of the following:
  - a. In accordance with the criteria of the Canadian Engineering Accreditation Board (CEAB), in a complementary studies elective course the principal subject matter must deal with **central issues, methodologies and thought processes of the humanities and social sciences**. Accordingly, complementary studies courses are most often courses offered by the Faculties of Humanities and Social Sciences, but courses from other areas such as Fine Arts and Business will be considered.
  - b. The course is outside the other course categories in the CEAB criteria, i.e., the course is not primarily Mathematics, Basic Science, Engineering Science or Engineering Design as defined in the CEAB criteria. A course whose primary emphasis is computer science, science, mathematics or statistics, for example, is not acceptable as a complementary studies elective.
  - c. A substantial portion of a complementary studies elective course must include material that is not covered elsewhere in the student's program. For example, a course in economics, which does count as complementary studies in the CEAB guidelines, cannot be used as an elective if it has a substantial overlap with the material covered in the required engineering economics course (ENGR 280).
2. Complementary studies credit will be given for courses transferred from another institution at the discretion of the Faculty. Students already registered in an UVic program should obtain approval before registering for a course elsewhere which they seek to transfer to UVic for complementary studies credit.
3. **Students must seek approval of a complementary studies course in advance if it is not on the approved complementary studies list, whether it is to be taken at UVic or elsewhere for transfer credit.**
4. The BEng/BSEng Student Programs Committee makes decisions regarding whether or not courses are acceptable for complementary studies credit. A list of courses suitable for credit as complementary studies electives is provided overleaf.
5. Neither the Faculty nor the University is responsible for ramifications, financial or otherwise, arising should a student enroll in a course that the Faculty subsequently deems unsuitable for complementary studies credit.

## Approved Complementary Studies Elective Courses - Effective August 2019

The courses listed below are courses suitable for complementary studies elective credit. This list is maintained by the BEng/BSEng Student Programs Committee and is updated regularly. You are responsible to make sure that you are using the most up to date version of this list available on the UVic Engineering website under Current Students/Resources/Forms **\*This is not an exhaustive list.**

For all courses listed, students must still comply with published guidelines.

**If a course is not on the list, you must contact your program advisor (listed below) in order to receive permission and credit for a Complementary Studies elective.**

Within the past 5 years, the following courses have been approved as Complementary Studies electives:

ADMN 200	ECON 318	GNDR 207	HLTH 251	PHIL 252
