Course Objectives

Electrical power system is the backbone of modern civilization. The demand of electricity is growing with every passing day. The electrical power system is also growing as a consequence. Along with the size, the challenges in maintaining and operating the power system are also increasing for a variety of reasons such as the penetration of renewable energy sources, increased use of electrical transportation systems, the advent of smart grid and increased cyber-electrical control etc. Consequently, it is important for an upcoming electrical engineer to be familiar with the fundamentals of electrical power systems. ECE 488 provides an ideal opportunity for you to get introduced to the world of electrical power systems. The primary objectives of the course are to:

(a) Study in detail about the components constituting electrical power systems
(b) Analyze electrical power systems under normal operating conditions
(c) Analyze electrical power systems during contingencies

Learning Outcomes

By being a part of ECE 488 and actively involving yourself in the learning process, you shall be able to

(i) Identify the role of various elements of an electrical power system
(ii) Develop equivalent circuit models of all key components
(iii) Represent an electrical power system using single line diagram
(iv) Compute parameters of significance under normal operating conditions
(v) Analyze the impact of different faults on a power system
(vi) Familiarize with industry standard power systems analysis software

Syllabus

The syllabus comprises of:

Basic concepts of electric power systems illustrating usage of admittance and impedance matrices for load-flow solutions. Three-phase salient and round rotor synchronous machines. Three-phase transformer. Transmission line parameters. Representation and analysis of transmission lines including ABCD parameters. Symmetrical components and sequence networks. Symmetrical faults such as three phase faults. Unsymmetrical faults such as single line to ground, double line and double line to ground faults. (pre-requisite course: ELEC 370).

Lecture

A-Section(s): A01 / CRN 20914
Marker TA – Mehran Amigh
Days: Tuesdays, Wednesdays, Fridays
Time: 10:30 AM to 11:20 AM
Location: Engineering & Computer Science (ECS) 108
Required Text
Entire course will be based on the following text book. Therefore, it is essential you have it with you.
Title: Power System Analysis
Authors: Hadi Saadat
Publisher: PSA Publishing LLC
Edition: 3rd Edition

Required Software:
Software simulation is an essential skill to be acquired by every power engineer. In this course you will get a chance to familiarize with an industry standard software called PSS/E. In addition, you will be using MATLAB/Simulink. MATLAB/Simulink, student version (https://matlab.engr.uvic.ca/) is free for you all. Therefore, please install the software in your personal computer. Please install the following toolbox in addition to MATLAB/Simulink.
- Simscape Power Systems (formerly SimPowerSystems)
Details on how to install PSS/E student version will be provided later.

Assessment:
Validating one’s learning is important and hence in ECE 488, many opportunities will be provided to you to assess your learning. In order to ensure you have enough time to take appropriate corrective actions upon assessing, I propose the following periodic assessment scheme:

- In-class quizzes: 5 x 2 = 10% Wednesdays except 9-Jan, 20-Feb, 27-Feb, 3-Apr
- Assignment Quizzes: 4 x 2.5 = 10% Dates: To be announced in CourseSpace
- Mid-term: 1x20 = 20% Due Date: 27-Feb-2019
- Software Project: 1x10 = 20% Due Date: 5-Apr-2019
- Final Exam: 1x50 = 50% Date: To be announced

I have furnished more details about each of the assessment scheme in Appendix A. Please take time to read through it.

Further, as most of you would be graduating soon after completing ECE 488, I believe it is important that these assessments also help you nurture professionalism. Therefore, about 10% of marks would be allotted towards:
- (a) On-time submission
- (b) Organization & legible presentation

The final grade obtained from the above marking scheme for the purpose of GPA calculation will be based on the percentage-to-grade point conversion table as listed in the current Undergraduate Calendar.

https://web.uvic.ca/calendar2019-01/undergrad/info/regulations/grading.html

There will be no supplemental examination for this course.
https://web.uvic.ca/calendar2019-01/undergrad/info/regulations/exams.html#

Note to students: In case you have any issues with the conduct of the course, you should discuss them with me, the instructor, first. If these discussions do not resolve the issue, then feel free to contact the Chair of the Department by email or the Chair’s Assistant to set up an appointment.

Accommodation of Religious Observance:

Policy on Inclusivity and Diversity:
https://web.uvic.ca/calendar2019-01/general/policies.html
Standards of Professional Behaviour: You are advised to read the Faculty of Engineering document Standards for Professional Behaviour, which contains important information regarding conduct in courses, labs, and in the general use of facilities.
https://www.uvic.ca/engineering/assets/docs/professional-behaviour.pdf

Cheating, plagiarism and other forms of academic fraud are taken very seriously by both the University and the Department. You should consult the entry in the current Undergraduate Calendar for the UVic policy on academic integrity.
https://web.uvic.ca/calendar2019-01/undergrad/info/regulations/academic-integrity.html

Equality: This course aims to provide equal opportunities and access for all students to enjoy the benefits and privileges of the class and its curriculum and to meet the syllabus requirements. Reasonable and appropriate accommodation will be made available to students with documented disabilities (physical, mental, learning) in order to give them the opportunity to successfully meet the essential requirements of the course. The accommodation will not alter academic standards or learning outcomes, although the student may be allowed to demonstrate knowledge and skills in a different way. It is not necessary for you to reveal your disability and/or confidential medical information to the course instructor. If you believe that you may require accommodation, the course instructor can provide you with information about confidential resources on campus that can assist you in arranging for appropriate accommodation. Alternatively, you may want to contact the Center for Accessible Learning located on campus.

The University of Victoria is committed to promoting, providing, and protecting a positive, and supportive and safe learning and working environment for all its members.

Course Lecture Notes: As a first time learner of electrical power systems, you are encouraged to study from the text book. Therefore, I shall refrain from providing any lecture notes. On the other hand, I shall supply you with a tentative schedule of topics I intend to discuss during lecture hours. I recommend strongly that you spend time reading about the topic both before and after the lecture. Where ever appropriate, I might supply a few materials that would supplement the text book.

Unless otherwise noted, all course materials supplied to students in this course are intended for use in this course only. These materials are NOT to be re-circulated digitally, whether by email or by uploading or copying to websites, or to others not enrolled in this course. Violation of this policy may in some cases constitute a breach of academic integrity as defined in the UVic Calendar.

Course Evaluation: Towards the end of term, as in all other courses at UVic, you will have the opportunity to complete an anonymous survey regarding your learning experience (CES). The survey is vital to providing feedback to me regarding the course and my teaching, as well as to help the department improve the overall program for students in the future. When it is time for you to complete the survey you will receive an email inviting you to do so. You will need to use your UVic Netlink ID to access the survey, which can be done on your laptop, tablet, or mobile device. I will remind you and provide you with more detailed information nearer the time but please be thinking about this important activity during the course.

Continuous Feedback: I am committed to a memorable learning experience for my students, and I will try my best to help out in whatever way I can. For that I need to receive your input. Oral/written/email feedback are all welcome anytime during the term.

Sexualized Violence Prevention and Response at UVic
UVic takes sexualized violence seriously, and has raised the bar for what is considered acceptable behaviour. We encourage students to learn more about how the university defines sexualized violence and its overall approach by visiting www.uvic.ca/svp. If you or someone you know has been impacted by sexualized violence and needs information, advice, and/or support please
contact the sexualized violence resource office in Equity and Human Rights (EQHR). Whether or not you have been directly impacted, if you want to take part in the important prevention work taking place on campus, you can also reach out:

**Where:** Sexualized violence resource office in EQHR; Sedgewick C119  
**Phone:** 250.721.8021  
**Email:** svpcoordinator@uvic.ca  
**Web:** [www.uvic.ca/svp](http://www.uvic.ca/svp)
Appendix A

Assessment:
As indicated in the course outline, I suggest the following periodic assessment scheme:

<table>
<thead>
<tr>
<th>Assessment</th>
<th>Weightage</th>
<th>Dates</th>
</tr>
</thead>
<tbody>
<tr>
<td>In-class quizzes</td>
<td>5 x 2 = 10%</td>
<td>Wednesdays except 9-Jan, 20-Feb, 27-Feb, 3-Apr</td>
</tr>
<tr>
<td>Assignment Quizzes</td>
<td>4 x 2.5 = 10%</td>
<td>Dates: To be announced in CourseSpace</td>
</tr>
<tr>
<td>Mid-term</td>
<td>1x20 = 20%</td>
<td>Date: 27-Feb-2019</td>
</tr>
<tr>
<td>Software Project</td>
<td>1x10 = 10%</td>
<td>Due Date: 5-Apr-2019</td>
</tr>
<tr>
<td>Final Exam</td>
<td>1x50 = 50%</td>
<td>Date: To be announced</td>
</tr>
</tbody>
</table>

In-class quizzes:
The main objective of the quizzes is to provide instant and frequent feedback about your understanding of the course material. Key information about these quizzes are:
- **Day:** Every Wednesday (except 9-Jan, 20-Feb, 27-Feb, 3-Apr)
- **Time:** During lecture hour
- **Duration:** 15 minutes
- **Type of questions:** Multiple choice questions or descriptive type
- **Restrictions:** No discussion with peers
- **Accommodations:** You can refer to any resource such as notes, text book or internet
- **Calculator:** Any type of calculator can be used
- **Weightage:** Each quiz will have 2% weightage

I do understand that you might not be able to appear for all the quizzes. Hence, I shall consider only your best 5 performances towards the grade.

*Note: These quizzes will be administered using an education software called TopHat. In order to participate in these quizzes, you need to enroll with the software. There is a small fee (about $30 per term) to use this software. I shall be sending an invitation to each one of you before the first week of classes end.*

Assignment Quizzes:
In this course, there will be 4 assignment based quizzes. Each assignment might have about 10 questions. I shall also be providing the complete solution to these questions. Each of you is expected to learn to solve these problems. The quizzes will be based on these assignment problems. Some important information about the assignment quizzes are given below:
- **Quiz Dates:** To be announced in CourseSpace
- **Duration:** 45 minutes
- **Type of questions:** Multiple choice questions and descriptive type
- **Restrictions:** No discussion with peers, no access to text book or lecture notes or internet
- **Accommodations:** Hand-written notes up to one single sided A4 sheet
- **Calculator:** Any type of calculator can be used
- **Weightage:** Each assignment quiz is worth 2.5%

Please note, I shall assign a few marks for legible and methodical presentation just to ensure you present your answers in a professional manner. In case you find any issue with the way your assignment quiz is marked, please do not hesitate to contact the TA via email.

Midterm:
Midterm exam will help you review all topics covered in the first half of the term. Some useful information about the midterm exam are given below:
- **Date:** 27-Feb-2019
- **Time:** During lecture hour
- **Duration:** 45 minutes
Type of questions: Multiple choice questions and descriptive type
Restrictions: No discussion with peers, no access to text book or lecture notes or internet
Accommodations: Hand-written notes up to two single sided A4 sheets
Calculator: Any type of calculator can be used
Weightage: Midterm exam will be worth 20%

Please note, I shall assign a few marks for legible and methodical presentation just to ensure you present your answers in a professional manner.

Software Project:
One of the key intended learning outcomes of this course is to familiarize you with industry standard power systems analysis software tool. To accomplish this learning outcome, I shall assign a take home project based on a software called PSS/E. I shall upload more details about this project in CourseSpace before the reading break week.
Please note, all students will be working on the same simulation project to ensure fairness. Details about assessment will be discussed during a lecture and will be shared via CourseSpace.

Final Exam:
Final exam will be comprehensive in nature i.e. any topic discussed during the term can be tested. Some key information about the final exam are given below:
  Date: To be announced
  Time: To be announced
  Duration: 3 hours
  Type of questions: Multiple choice questions and descriptive type
  Restrictions: No discussion with peers, no access to text book or lecture notes or internet
  Accommodations: Hand-written notes up to two single sided A4 sheets
  Calculator: Any type of calculator can be used
  Weightage: Final exam will be worth 50%

Please note, I shall assign a few marks for legible and methodical presentation just to ensure you present your answers in a professional manner.
