Title:	24-06263 Petch, Elliott, Cunningham Chiller Replacement
Location:	Elliott Building Chilled Water System
Description:	<p>Facilities Management and Caird Mechanical are currently working on the replacement of the chillers serving the Elliott, Petch and Cunningham buildings. As part of this work, we will be draining the Elliott building's chilled water lines, to allow the addition of glycol in the larger system.</p> <p>This work will take three days, during which time the Elliott building will temporarily lose the ability to remove heat from spaces via the chilled water loop. If you suspect your equipment or temperature-sensitive storage is directly or indirectly cooled by this loop, please reach out to me to discuss your options.</p>
Time frame:	February 2, 2026 – February 4, 2026, all day
