**Title:** \* RESCHEDULED\* 24-06263 Petch, Elliot, Cunningham Chiller Replacement

**Location:** Elliot Building Chilled Water System

**Description:** Facilities Management and Caird Mechanical are currently working on the replacement of the chillers serving the Elliot, Petch and Cunningham buildings. As part of this work, we will be draining the Elliot building's chilled water lines, to allow the addition of glycol in the larger system.

This work will take three days, during which time the Elliot building will temporarily lose the ability to remove heat from spaces via the chilled water loop. If you suspect your equipment or temperature-sensitive storage is directly or indirectly cooled by this loop, please reach out to me to discuss your options.

**Time frame:** Previous Schedule: February 2, 2026 – February 4, 2026, all day

**Revised Schedule: February 23, 2026 – February 25, 2026, all day**

**FMGT contact:** Jen Miley, Project Manager
