Title: 22-05571 PCH Building Air Balancing and Repairs

Location: Petch Building

Description: * Shutdown Reminder *

Facilities Management, JB Sheetmetal and Rain City Technical have restarted their air balancing efforts in your building.

Per our schedule released in February and the reminder sent two weeks ago, we are balancing AHU 4 this week. Please see that chart below for the room numbers of affected labs. As before, technicians will be in many spaces taking measurements.

Please take the following precautions:

1. Please refrain from using fume hoods during this time.
2. Please store all hazardous chemicals in the appropriate acid or flammable cabinets and wipe up any spills inside fume hoods. Our technicians are unable to tell if a spill is just water or something more serious.

Please see the chart below for the remainder of the fume hood shutdown schedule as we complete this work. The remainder of the April schedule has been adjusted due to feedback. If the specific time frame suggested creates a significant hardship for your lab, please reach out to me to discuss. I apologise for the interruption to your lab and research.

Time frame: AHU 4 Fume hoods **April 13th, 8:00 am – April 15th 8:00 pm**
AHU 6 Fume hoods **April 14th, 8:00 am – April 17th 8:00 pm**
