Title:	Engineering Expansion Project – ECSE material delivery via ECS Elevator
Location:	Level 1 ECS interior atrium and by elevator to upper floors
Description:	In support of the Engineering Expansion Project, Bird Construction will need to move some washroom partition panels through ECS into the ECSE site. This is as a result of the new building elevator being offline while it undergoes testing. The delivery would be offloaded on Monday June 22, at the rear north side of ECS. The panels will be moved into the ECSE site over the week. They would need to move sets of panels three times to the upper floors, which would take between 1-2 hours that day. They would use the ECS elevator to access the upper floors and move the panels through the poly barrier via the atrium ramps and into the ECSE.
Time frame:	week of June 22
