

Facilities Notice

Title:	ECS – Building Automation System Maintenance
Location:	Building #233 – Remote Configuration
Description:	In preparation for connecting the new Engineering and Computer Science Expansion and High Bay Structures Lab to the Building Automation System, Facilities Management has contracted SRD Controls to separate the building from the Legacy system. This aligns with our future goals to move buildings from the legacy system, thus utilizing the EDC servers for routing traffic. This Wednesday, August 19th, if trying to access the ECS building, you may experience time-outs and unreachable graphic areas of the building. In the event of an emergency, please contact Ryan Bruggemann at 250-413-7973.
Time frame:	Wednesday August 19, 2026
FMGT contact:	Peter Lagan, Building Automation System Manager
