

Facilities Notice

Title:	Elliot Building, ELL – Building Automation System Maintenance
Location:	Elliot Building, Building #116 – Legacy Controller #49A1 Upgrade
Description:	<p>Facilities Management has contracted SRD Controls to update the Building Automation System DDC Controller in the Clean Room #018. This controller is responsible for running variable speed drives (VFD's) to ensure pressure relationships between spaces are maintained. The drives will be placed into a Manual State such that the existing pressure relationship will remain as it is. Temperatures in the room will continue to be controlled separately by the air conditioning system.</p> <p>Following the controller upgrade, all the system Inputs and Outputs (HVAC, temperature sensors, heating control valves, etc.) will be tested to ensure they operate as expected.</p>
Time frame:	Monday, October 26, 2026
