Title:	Bob Wright Centre - Electrical shut-down **REVISED DATE**
Location:	Bob Wright Centre – level 0 areas
Description:	**Facilities Management and Carmichael Engineering are coordinating a 30-minute power shut-down on November 19th to add a new electrical circuit into an emergency power panel. During this time, several systems will be deenergized including emergency lighting and mechanical pumps.** **We understand that this may cause error massages on the building monitoring system (BMS) and some of the building lights will be out. This will not effect the majority of lights which are fed from a separate panel.** **Areas know to be fed from this panel are marked up on the attached plan for reference. We apologize for any inconveniences this causes.**
Time frame:	**November 19th 7:30am-8:00am**
