Title: 21-04927 ELW Heat Recovery Coil Installation

Location: ELW – All Rooms

Description: **Room by Room Baseline Measurements**

FMGT and Rain City Technical are working to install energy saving heat recovery coils on all air handlers in the Engineering Lab Wing.

In support of this work, we will be performing full building baseline measurements of the mechanical system. This will require us to briefly enter all spaces in ELW.

Rain City's technician will be taking air flow measurements at your fume hoods, air diffusers and any return grills. An A-frame ladder will be used in most rooms.

This work will not produce dust, significant noise or significant vibration. In general, you may continue working as us usual during this measurement process.

Time frame: Thursday, November 5th, 9:30 am to 1:00 pm

FMGT contact: Jen Miley, Project Manager
