Facilities Notice

**Title:** New Service Building – X-Ray Inspection

**Location:** Saunders Complex (map is attached)

**Description:** As part of the New Service Building project supply of heating, revisions have to be completed to the existing boiler piping in Saunders Workshop #1. These revisions include installing additional welded pipe in the boiler room, which in turn requires the welds to be x-ray inspected.

**Time frame:** The x-ray inspection is scheduled for October 5th, 2017. In order to provide a 100ft. safety zone around the x-ray inspection room, all staff and vehicles must stay fully clear of the safety zone as of 4:00 pm. With the approval of Ron Proulx, Executive Director of Facilities Management, all Saunders and Workshop #2 staff should quit work today at 4:00 pm and depart from the Saunders Complex.

The testing is expected to be completed by 8:00 pm, October 5th. Positive results of the x-ray testing will allow the boilers to be re-filled and the heat be available in the Saunders building the morning of Friday, October 6th, 2017.
