Facilities Notice

Title: Locating of existing underground site services and Geotechnical Investigation
16-02265 Proposed New Student Residence Facilities

Affected Locations: Craigdarroch Student Residences
Cadboro Commons
Gordon Head Student Residences
Parking Lot 1

(Map attached)

Description: This scope of work is a preliminary step in informing the preferred location(s) of the proposed new student residence facilities.

Facilities Management, Campus Security, Residence Services in conjunction with Contractors will be coordinating the location of existing underground site services and undertaking a geotechnical investigation by method of approximately 20 boreholes. The boreholes will determine soil conditions and the soils engineering properties. Survey control of the geotechnical investigation will also occur.

A flat bed truck with the drilling rig will be parking in Lot 5. Throughout the duration of this work, the truck will unload and load the drilling rig on Ring Road adjacent to the Ring Road Residence and along the service road behind the Student Union Building.

Drilling rigs will be working throughout all locations listed. To provide an extra measure of safety for the campus population, traffic control personnel will be on site to direct pedestrian traffic as the drilling rigs will be repositioned throughout the locations listed.

Within Parking Lot 1 and Lot 5 vehicular parking and traffic may be impacted, however a through traffic route will be maintained. Barricades and signage will be installed as required. Please abide by the instruction of traffic control personnel during this work.
