Title: PETCH Building – Chiller Steel Frame Lift - Safety Zone

Location: Petch Building – Roof, walkways and grassed area on north side of PCH

Description: For the next phase of the roof mounted chiller plant installation, Facilities Management and Kinetic Construction will be hoisting the steel framework to support the chillers and pump-house on Wednesday, February 21.

A safety zone will be created on the north side of the PCH Breezeway to house the crane, and two materials trucks. For safety reasons, the walkways on the north side of PCH building, and the east access to Cunningham will be closed during the hoisting of steelwork.

During the closures, traffic control measures will be in place and pedestrians will be directed away from the work toward the entrances in the center of the Petch Building, and to the north of the Cunningham Building.

Time frame: Wednesday, February 21, 2018; 7:30AM to 5:00PM
