Title: Cunningham Building – Scheduled Emergency Power Shutdown

Location: Cunningham Building

Description: In order to complete infrastructure upgrades to emergency standby power systems in Cunningham Building, Facilities Management and Kinetic Construction need to complete a temporary shutdown of the emergency power distribution which will affect the entire building.

The shutdown has been carefully planned and all equipment on emergency circuits will be re-fed using temporary feeders or extension cords prior to the shutdown. The data network will be unaffected by the outage.

On Thursday, March 22, emergency power will be de-energised at 8am. Contractors will work throughout the day to upgrade the panel in the CUN electrical room, as well as sub-panels around the CUN building. Any labs or classes should be unaffected by the work, and contractors have been informed of black-out times for room access when labs are in progress.

Time frame: Thursday, March 22, 2018: 8am – 8pm (Estimated time of completion)
