Title: Elliott Building - Scheduled Electrical Power Shut Down

Location: Elliott Building – Lab Wing

Description: Facilities Management is working with Perma Construction on the Elliott Second Floor Lab Project. In order to safely connect the lighting and general power for Lab/Office 255 into the building electrical system, we will need to shut down power to panel SDC 2A. This will affect general power and lighting to all floors of the Lab Wing but will not affect the office wing, mechanical equipment, emergency lighting or fire alarm systems.

*It is advised that equipment is powered off as you leave the building on Friday, March 23, 2018.* It is recommended that electronic equipment, such as personal computers, facsimile machines, electronic and laboratory equipment be unplugged from power receptacles to avoid the risk of damage that could result from voltage fluctuations which may occur during this work. Please DO NOT unplug any telephone sets.

Time frame: Saturday, March 24, 2018 – 7:30 AM to 4:00 PM

Facilities Management contact: Scott Kingham, Project Manager
