Title: Petch Building – UPDATED Breezeway Ceiling and Lighting Installation

Location: Petch Building – Breezeway

Description: Facilities Management and Kinetic Construction will shortly be commencing on the installation of a new ceiling and enhanced lighting to the Petch breezeway. The work is scheduled to commence on April 16, and be complete on August 2, 2018. For the full duration of work, Petch breezeway cycle racks will be relocated to temporary locations around the PCH building.

NEW: During construction a 1500mm wide covered walkway will be provided to maintain north-south and east-west access through the PCH breezeway. This will greatly reduce the need for full closures. The Petch breezeway will now remain open between April 16 – April 27.

As breezeway access widths are restricted, signage directing cyclists to dismount will be posted on the breezeway ramps.

Finally, on April 18 and 19 a crane will be hoisting steel to the Petch roof, and the area to the north of the breezeway will be closed. Access will be maintained through the breezeway between the east and west sections of PCH building.

Time frame: Monday, April 16th, to Thursday, August 2nd, 2018
