Title: New Saunders Salt Storage Shed – Construction

Location: North West of SAU Parking Lot #11 (see attached sketch)

Description: Facilities Management and Aral Construction will be proceeding with the demolition of the site of the new Salt Storage Shed – location noted in red outline on the attached sketch. Site construction is expected to commence on November 14, 2018.

During construction, access to the 2 gator storage sheds will remain available. However access beyond that to the Grounds recycling yard will not be available to all vehicles – due to proximity of the new Salt Shed to the chain link fenced gates.

Gators and small trucks may access the Grounds recycling yard by carefully taking the route that passes next to the new Tote Wash. Larger vehicles including garbage trucks intending to access the Grounds recycling area or wash pad should proceed via the road next to B Hut. See attached sketch. These temporary measures will remain in place from November 14, 2018 to February 6, 2019.

Time frame: Wednesday, November 14, 2018 to February 6, 2019
