Title: MacLaurin D-Wing Seismic Upgrading – Hazardous Material Abatement

Location: Interior MacLaurin (MAC) Building D-Wing

Description: Kinetic Construction Ltd. and their environmental subcontractor LGF Environmental Services Ltd. will be conducting limited hazardous material abatement in accordance with WorkSafe BC requirements within their enclosed and hoarded construction work zones, periodically over the phased construction of the MacLaurin D-Wing Seismic Upgrading project.

Work is expected to start mid November, and continue within their enclosed work zones, until total project completion, Fall 2020.

Time frame: Mid November 2018 through Fall 2020
