Title: Petch – Building Heat and Hot Water Outage

Location: Petch Building (PCH)

Description: Facilities Management and Mac’s Heating will be isolating the District Energy System in Mechanical Room 042 to complete work on the building heat and hot water systems.

During this time building heat and hot water will not be available. The systems will be restored early the following day, but depending on the outdoor temperature it may take some time for the building temperature to reach a normal level. For this reason it is advised to bring an extra sweater on Wednesday.

We apologize for any inconvenience.

Time frame: Tuesday, January 15, 2019 - 5:00PM through 5:00AM
