Title: Engineering Precinct Expansion project  
**Land Surveying and Laser Scanning**

Location:  
**Land Surveying:** Engineering Precinct including roof areas, partial Ring Road and surrounding areas. [Refer to attached image.]

**Laser Scanning:** South façade of ECS and ELW.

Description: WSP will perform Land Surveying and Laser Scanning as part of the design development of the Engineering Precinct Expansion project.

Land Surveying personnel and equipment will be set up throughout the precinct and surrounding land, including Ring Road.

Laser Scanning will involve the use of lasers. Please close all exterior windows facing towards Ring Road as this will give the best results for the scan. It is possible that some weaker light from the scan could make it through the glazing but is not harmful to the eye. Occupants can draw blinds if they wish.

Time frame:  
**Land Surveying:** February 18, 2020 through February 27, 2020  
**Laser Scanning:** February 18, 2020 through February 20, 2020  
Some personnel may walk the site between February 15 and February 17 in preparation for the work.
