Title: 21-4927 ELW Safety and Energy Upgrades- Fume Hood Impacts

Location impacted: Engineering Lab Wing: B120, B239, B225

Description: Cairn Mechanical and Universal Sheet Metal will be installing controls in support of the recent mechanical system upgrades in ELW's B wing. This work will occur over the next two weekends and will require a temporary turndown of the supply air. This will in turn affect the containment ability of associated fume hoods.

During these select weekend days, we request that you temporarily close and refrain from using your fume hoods in the following labs.

B120 MiNa lab

Saturday, November 16th

Sunday, November 24th

B239 BSL2 Lab & B225 H₂ Lab

Saturday, November 23rd

Sunday, November 24th

We apologise for any inconvenience.

Time frame: 8:00 am – 3:00 pm
