Title:	Engineering Expansion Project ECS window infill work in Rm # 442, 542, 642
Location:	ECS Level 4, 5 and 6
Description:	<p>In support of the Engineering Expansion Project, Bird Construction and FMGT Project Management Services will need to infill windows in ECS 442, 542 and 642. Due to the design of the new ECSE building that will adjoin the existing ECS building, the south facing windows in the rooms identified will need to be infilled to solid walls. This work will begin Mon. May 5, and will take at least 2 weeks to complete. Bird Construction will set up a construction zone with a poly enclosure around the work area, to keep the adjacent areas as dust free as is possible while this work is underway. Note: while provision has been made to allow access to offices that are directly off the spaces noted, there will be construction noise, and transport of construction material to and from the work zone. Please exercise caution, and obey all safety signage and construction personnel.</p>
Time frame:	Monday May 5 – Friday May 16, 2025 (completion date TBC).
