Title: 24-06263 Petch, Elliot, & Cunningham Chiller Replacement

Location: Petch, Cunningham

Description: Crane Lift / Partial Building Closure

Facilities Management and Caird Mechanical will be replacing the second of two chillers on the roof of the Petch Building on Friday, May 30, 2025

This will be a full day process during which the old chiller will be lifted off the roof from the west/loading dock side of the building and its replacement will be lifted into place using the same crane.

Due to the significant weight of this chiller and the act of lifting it above the roof, we need to close the Petch Building directly under the path of the crane lift, as a precaution.

This will close:

- -All restrooms on the north-west end of the building
- Several offices in Petch
- A section of the far west end of the Petch corridor (all levels)
- The Petch-Cunnigham connector (all levels)

The closure will affect the following rooms

Ground floor: 003-015, 020, 021 First floor: 101- 107, 109

Second floor: 206, 207 (suite), 209, 216, 218 218A

If your office or a portion of your lab is among those affected by this closure, I sincerely apologize for the disruption. Please try to make sure that you have anything you need to work in an alternate location next Friday. If you absolutely need to access your office or this portion of your lab, it may be possible in between crane lifts. Please reach out to me to coordinate a time.
