

FACILITIES MANAGEMENT

Saunders Building

PO Box 1700 STN CSC Victoria BC V8W 2Y2 Canada

Title: 23-06167 DTB Norris Lab

Location impacted: **David Turpin Building**

Description: Facilities Management is currently working on upgrades to the Norris Laboratory in the David Turpin building.

In support of this work, we will need to shut down electrical panel 1H. The electrical shutdown will affect most of the 1st floor of B-Wing between the B-Wing elevator lobby and the doors to A-Wing.

Please ensure that any sensitive electrical equipment is shut down prior to this outage, to avoid power surges or damage due a sudden loss of power. This shutdown will affect fume hood function. Please ensure all hoods in this area remain closed for the duration of the shut down.

Please reach out to me with any question or concerns.

Time frame: January 14th, 2024, from 7:30 am – 9:30 am
