

FACILITIES MANAGEMENT

Saunders Building

PO Box 1700 STN CSC Victoria BC V8W 2Y2 Canada

Title: 20-04528 Engineering Lab Wing (ELW) Design Studio

Location: District heat loop valve repairs – ELW, PCH, ELL, & BWC

Description: Facilities Management and Aral Construction are currently working on the renovation of the boiler room on the north side of the ELW building. As part of this work, we will be relacing a series of failed valves on part of the district heat loop.

This work will take approximately 2 weeks, with the noted building losing the ability to heat domestic water for portions of or for the full outage duration. During this time, you will have access to water at all sinks, but the water will not become hot.

Additional notice: During the period of Monday, June 24th through Friday, June 27th, if possible, the occupants of ELW, PCH, ELL, & BWC should refrain from using the hot water taps. This will reserve any residual heat in the hot water system for use at the eyewashes in the event of an incident.

Time frame: Monday, June 24th through Friday, June 27th
