

05 70 01 FINISHES

1. Typical finishes for exposed (outdoor) metal fabrications:
 - i. Hot-dip galvanized.
 - ii. Stainless steel.
 - iii. Clear anodized aluminum.

2. Where painted assemblies are required, use durable factory finish (preferred), or a marine grade system:
 - i. Electrostatic painting.
 - ii. Factory pre-painted process.
 - iii. Epoxy coat and aliphatic urethane topcoat, marine grade system. For increased durability, consider galvanized steel for painted assemblies.
