project: Campus Wayfinding
number: FM 09-8567
issue date: April 1, 2019

sign: Sign No. 11 - Street Blade
sheet name: title sheet and drawing list
scale: as noted

sheet number: 01
core colours

- clear anodized coating
  application: sign structure

- PANTONE 185 C
  application: pinstrip, arrows

- white
  application: text

- PANTONE Cool Gray 11 C
  application: background

- PANTONE Black 3 C
  application: background

- PMS Black 3C
  black anodized
  application: blade body

samples of typeface family

Myriad Pro Semi Bold

ABCDEFghijklmnopqrstuvwxyz

1234567890
**blade type a (long) double sided  scale 1:5**

- Description: Digitally printed vinyl protected with anti-graffiti, optically clear overlaminate
- Blade: black anodized aluminum
- Vinyl: 3M IJ180, MPI 2005 or equivalent
- Overlaminate: 3M 8914, Avery DOL 6060 or equivalent.

1) One piece vinyl to be printed on, installed as per manufacturer’s recommendations.
2) Use compatible UV inks and overlaminates as recommended by manufacturer.
3) Wrap vinyl and overlaminate over the edges of the aluminum panel.
4) If long text message, then typeset should be scaled down horizontally to fit in the provided space - coordinate all cases with University of Victoria.

Refer to Adobe Photoshop files for detailed sample layout.

**blade type b (short) double sided  scale 1:5**

- Description: Digitally printed vinyl protected with anti-graffiti, optically clear overlaminate
- Blade: black anodized aluminum
- Vinyl: 3M IJ180, MPI 2005 or equivalent
- Overlaminate: 3M 8914, Avery DOL 6060 or equivalent.

1) One piece vinyl to be printed on, installed as per manufacturer’s recommendations.
2) Use compatible UV inks and overlaminates as recommended by manufacturer.
3) Wrap vinyl and overlaminate over the edges of the aluminum panel.
4) If long text message, then typeset should be scaled down horizontally to fit in the provided space - coordinate all cases with University of Victoria.

Refer to Adobe Photoshop files for detailed sample layout.
400mm dia. concrete foundation reinforced with 5-15M vert. 10M ties @ 300mm

1200mm x 1200mm x 250mm concrete footing reinforced w/ 4-15M each way, centre

225mm x 225mm x 19mm slip base plate w/ clear anodized finish welded to post.
4-19mm s/s anchor bolts

102mm dia. 6.4mm thick walls
aluminum tube w/ clear anodized finish (typ)

section a

225mm x 225mm x 19mm slip base plate w/ clear anodized finish welded to post (typ)
4-19mm s/s anchor bolts with washers and leveling nuts (typ)
nuts to extend max 10mm above bolt
Thread to be locked with Locktite 271 Red - clean any visible residue after application (typ)

if sign located in paved area provide expansion joint (typ)
fill with 35 MPa non-shrink grout (typ)

NOTES:
1) number, orientation and configuration of blades varies - refer to sign message schedule confirm with University of Victoria
2) maximum number of blades per sign - 8
3) max. number of blades per sign in one direction - 3
4-4 anchor bolts (if using 15-CB2400 bracket by Dyna)

General note: Manufacturer to confirm all dimensions prior to fabrication.
GENERAL NOTES

1. Provide self adhesive sign ID stickers. ID’s should correspond with ID’s shown on location plan.

2. Fasteners:
   - foundation (anchor bolts):
     - bolts: Fastenal part #47406 (1/2" s/s threaded rod)
     - washers: Fastenal part #71021 (1/2" s/s washers)
     - nuts: Fastenal part #70714 (1/2" s/s nuts)
   - thru bolts: Fastenal part #37815 (3/8" s/s x 1" button Socket cap screw)

3. Threadlocker: Locktite 271 Red

4. Whenever anchor bolts are cut, contractor to ensure cut surfaces (terminated coating) are protected against rusting.

5. Manufacturer to verify all dimensions prior to sign fabrication. All discrepancies should be reported to the Architect.

STRUCTURAL NOTES

DRAWINGS

1. These drawings show the completed project. The drawings do not show components that may be necessary for construction safety, which is the responsibility of the contractor.

2. The use of these drawings is limited to that indicated in the revisions column.

3. The information on these drawings shall not be used for any other project or works.

DESIGN

1. The structures shown have been designed in substantial accordance with the British Columbia Building Code 2006, which is based on the National Building Code of Canada 2005.

2. The following wind loads and factors were used: q50=0.63kPa, Iw=1.0-ULS, 0.75-SLS.

FIELD REVIEW BY STRUCTURAL ENGINEER

1. Structural Engineer provides field review only for the work shown on these structural drawings, and it is conducted with such frequency as Structural Engineer deems appropriate to ascertain that the work is in general conformance with the documents prepared by Structural Engineer.

2. Field review by Structural Engineer is not carried out for the Contractor’s benefit, nor does it make Structural Engineer guarantors of the Contractor’s work. It remains the Contractor’s responsibility to build the work in conformance with the contract documents. Structural Engineer shall not be responsible for the acts or omissions of the Contractor, Sub-Contractor, or any other persons performing any of the work or for the failure of any of them to carry out the work in accordance with the contract documents.

3. The work to be reviewed shall be generally complete.

CONCRETE AND REINFORCING STEEL

2. Reinforcing shall conform to CAN/CSA-G30.18 – Grade 400MPa.

3. Cover to reinforcing steel to be 50mm uno.

4. Portland cement shall be type gu unless noted otherwise.

5. Concrete shall have a compressive strength of 35MPa at 28 days, and conform to exposure class C-1 with a maximum water-cement ratio of 0.40 and air content of 5-8%. Maximum aggregate size to be 19mm.

6. No calcium chloride is permitted, in any form, in any concrete mix. Curing and protection of concrete for hot, cold or dry weather is to be as per clauses 7.4.1.8 and 7.4.2 of CAN/CSA.

STRUCTURAL ALUMINUM

1. Aluminum sections shall be new.

2. Aluminum alloys shall conform to the Aluminum Association publication Aluminum Standards and Data ISO 6361-2 or ISO 6362-2.

3. Extruded shapes, Tubes, Bolts, and Plate to be 6061 alloy uno.

4. Aluminum in contact with concrete or grout shall be given a heavy coat of alkali-resistant bituminous paint or other equivalent coating before installation.

5. Welding operators and procedures shall be qualified according to CSA W47.2.

6. Submit shop drawings for review prior to start of steel fabrication.

7. Fabrication practices and tolerances shall be in accordance with CAN/CSA-S16, except bolt holed edge distance tolerance to be -0, +2mm.

8. Anchor and connection bolts to be ASTM A193 Stainless Steel. Anchors shall be embedded 300mm into concrete, complete with a nut and washer each end.

9. Unless noted otherwise, column base plates shall be 20 mm minimum thick. Anchor bolt holes shall be punched undersize and reamed to size.

10. Provide 6 mm cap plates for all tube members uno.

11. Aluminum shall be connected with fillet welds all-around uno. Weld size shall match the wall thickness of the thinnest part being connected uno. Welds to be ground smooth.

TAMPER RESISTANCE AND CONNECTIONS

1. Connection hardware to be stainless steel uno.

2. Aluminum panels to be connected to structure with 6.4mm diameter stainless steel self-tapping screws at 450mm maximum centre to centre spacing.

3. Non-removable panels may be welded or glued by the manufacturer, as approved by Structural Engineer.

4. Panel connection screws to be tamper resistant “Torx-Pin” screws as supplied by O.E.M. Hardware of Surrey BC, or equivalent as approved by Structural Engineer.

5. Visible connection bolts shall be “Pentagon” tamper resistant bolts, with “Pentagon” nuts as supplied by O.E.M. Hardware of Surrey BC, or equivalent as approved by Structural Engineer. Anchor bolts to be secured with “Pentagon” security nuts.
