STATEMENT

I am a non-binary artist whose work mainly explores themes of placemaking in physical and digital realms through acts of queering space and objects. My work takes non-normative approaches to examining or replicating actions, objects and spaces created under dominating social structures. I explore these themes and concepts through working with sculpture, video, photo, digital modelling and generation, and installation. I selected ART 395 because I work best independently, with ample time, and space that is my own. I think that through those elements, as well as the guidance of multiple faculty members/working artists, My work can prosper into something beyond an assignment- I would appreciate the opportunity to delve into long-term, more research-based projects.
