Where MGB interns work
MGB internship

Following the academic portion of your degree, you will complete a global internship in an organization that:

- has an international component linking two or more global regions

OR

- is located in anywhere in the world that is not in your home country or region

Finding your internship

Internships are flexible in format: they can be anywhere between three to seven months, depending on the opportunities that appeal to you. Your MGB Internship Coordinator will assist you in your search for positions, work with you to prepare to begin your internship, and ensure that you successfully complete this mandatory component of your degree.
