Ninety-nine per cent of everything we buy comes to us by ship, according to the people who made the Canadian film *Sea Blind*. Ships bring us food, clothing, cars, and electronics. It is the vehicle of global trade. And because of their size and the immense amount of fuel they burn, ships belong to one of the most polluting industries in the world. The issues raised in the film are relevant to policy fields in shipping, environmental sustainability, endangered heritage and the future of energy. At Cinecenta at UVic on January 22, 2018

**Resilient communities: some events**
The future of resource communities in a shifting political landscape: conversations with people and organizations interested in and actively working on the myriad impacts of resource development throughout northern BC.

WWF head Megan Leslie speaks tonight (Jan 18), the symposium happens tomorrow (Jan 19), at UNBC in Prince George, BC. Livestreaming of everything is [here](https://www.unbc.ca).

**MOOCs and more MOOCs**
Massive Open Online Courses make learning and global connections so very easy! The PRiMTime blog of PRME has collected a slew of them related to the Sustainable Development Goals. Here’s a link to Part 1: SDG 1 (No Poverty) to 9 (Industry, Innovation and Infrastructure). And this is the link to Part 2: SDG 10 (Reduced Inequalities) to 17 (Partnerships for the Goals).
