Seminar Series

GRADUATE STUDENT SHOWCASE

The School of Health Information Science Seminar Series is pleased to present a special session: Graduate Student Showcase. This event highlights the innovative work, diverse interests, and emerging leadership from our HINF graduate student community at the University of Victoria.

The Graduate Student Showcase features four graduate students, each delivering a 10-minute presentation on a topic they are deeply passionate about, followed by a 5-minute question-and-answer period. This fast-paced format offers attendees an engaging opportunity to explore a range of perspectives, methods, and research questions shaping the future of health information science. Together, the talks showcase the breadth of graduate research within the school and the real-world impact of student-led inquiry.

The Graduate Student Showcase is designed not only to share research, but also to foster dialogue, mentorship, and community. It provides graduate students with a platform to develop their scholarly voice while inviting faculty, students, and guests to engage with new ideas in an accessible and interactive setting.

SPEAKERS

ASHLEY MORAN

MSc Student - Health Informatics

Whole Patient, Partial Records?
Exploring the Visibility of Belief-Based
Data in Digital Palliative Systems

REZA ALEMAY

PhD Student - Health Informatics

A Novel Evaluation Framework for
Inclusion of Large Language Models in
Clinical Decision Support Systems

DOUG WILLISCROFT

MSc Student - Health Informatics

Investigating Information Flows To and
From Informal Caregivers in Home-
Based Palliative Care

DESMOND HEDDERSON

PhD Student - Health Informatics

Building the First Paramedicine
Electronic Documentation Maturity
Model (P-EDMM)
