

## **CPE PRACTICE HOURS REQUIREMENT**

Each Consolidated Practice Experience CPE 3, 4, 5 and Nursing 491 has a requirement of 190 practice hours over a 6 week period. All hours must be completed according to program requirements. Additional hours may be required to meet respective course requirements or a student may request further learning opportunities. Additional hours are negotiated with the instructor, student and practice agency to ensure agreement amongst all parties and to keep within the Term end date as per the UVic calendar.

Once all the required/negotiated practice hours are completed by the student, the instructor determines whether or not the student has met all course requirements and passed the course. Do not make plans that will make you unavailable to complete required practicum hours until confirmed by your instructor that it is appropriate for you to do so.
