This course studies the architectural and urban history of Rome. From the foundations of the city to the consolidation of Christianity. We will study Rome's monuments and topography placing special emphasis on the Republican and Imperial city. The aim is to learn not only the city's buildings, its urban fabric and its people, but also to understand what these meant to past audiences.

Students will learn:
• Use archaeological and historical evidence to learn about the history of the eternal city.
• Gain knowledge of how the past can shape the present;
• Explore new technologies to study Ancient Rome, including 3D modeling and Virtual reality.
• Train students to communicate their knowledge and opinions effectively in essays and classroom discussion.
