Research at ancient Eleon engages UVic students and faculty, along with international colleagues, with the hands-on study of the ancient Greek world. This co-presented talk provides an overview of the University of Victoria’s excavation at ancient Eleon, a multi-period site in central Greece. This talk will focus on religious activity of the Archaic and Classical periods, subjects of study by several team members.

CAVI LECTURE
Thursday, 19 September 2019
David Strong Building C122
7:30 pm
Dr. Brendan Burke and Dr. Trevor Van Damme
